The Franco-American Programs at the University of Maine in Orono invite you to our Genetic Genealogy Workshop

Genetic Genealogy ~ How When Where and Why

New to the idea of DNA testing for genealogy research? Learn about the three major test types, Y-DNA, mtDNA, and atDNA. Find out what each test offers and which might be the best tool to help with your research.

Genetic DNA testing can give clues to the origins of your paternal and maternal lines. It can prove or disprove a genealogical problem. This testing can help find unknown family lines in cases of adoption or other separations from biological lines. It will find relatives with whom you share a common ancestor. DNA is a wonderful new tool to be used with traditional genealogical research.

Saturday, May 19th, 2018 10:00 a.m.

Nancy Milliken Mason is a genetic genealogist who has been doing traditional genealogy research for over 30 years. She travels when and wherever she can to attend workshops and conferences and to give presentations about genetic genealogy. Nancy was born in Portland, Maine and grew up in Cumberland. She has many stories to share about using DNA to assist with traditional research.

To Register: Contact Lisa Desjardins Michaud at Lisam@maine.edu or 207-581-3789.

The Franco-American Centre is located at Crossland Hall (across from the Alfond Arena), University of Maine, Orono.

This workshop is made possible by a generous donation on behalf of the Adrien Lanthier Ringuette Library and Franco-American Programs.
