

Are You Interested in Public Health?

Public health promotes and protects the health of people and the communities where they live, learn, work and play. From conducting scientific research to educating about health, people in public health work to assure the conditions in which people can be healthy. This can range from vaccinating children, educating about the risks of substance use, setting safety standards or developing school nutrition programs. Public health works to track disease, prevent injuries and shed light on why some of us are more likely to suffer from poor health conditions than others.*

Join us for a
public health
info session to learn
more about the field
and opportunities for
involvement

**Wednesday
February 1st
3-4pm**

Bangor Room
5748 Memorial Union
Orono, ME 04469
